

28.09.2008 (12:12 CET) - Valencia (ES) - Alinghi

For the record

Ernesto Bertarelli and Larry Ellison had a positive meeting yesterday in California, discussing possible solutions to the current situation of the America's Cup. They share the same passion for the sport of sailing and for the America's Cup and they both want to get it back on the water and see an evolution of the event. Whilst no definitive decision was taken after this discussion, further meetings will be held in the immediate future between Alinghi and BMW Oracle Racing. Alinghi will also continue to hold meetings with other Challengers to discuss about how to move ahead the America's Cup.
